

ADAM C. HARTE

Technical Program Manager · Cloud & AI Partnership Delivery

Washington, DC | Open to relocation (SF / NYC / Seattle) | 512.743.6076 | adamcharte@gmail.com | linkedin.com/in/adamharte

// SUMMARY

Technical program and partner-delivery leader with **18+ years** delivering cloud and AI programs for enterprise and government customers at system integrators. Currently program manager for an **enterprise AI technology partnership** and an **AI Governance SME at Slalom**. Lead cloud migration and application modernization delivery, coordinating across engineering, product, security, legal, and policy teams while engaging technical stakeholders and executive leaders. Platform-agnostic across AWS and Azure, with Google Cloud Digital Leader certification in progress. Strength: translating customer business needs into delivered cloud solutions and building the partner relationships that move enterprise adoption forward.

// CORE COMPETENCIES

PARTNER & CUSTOMER	Technology partner & alliance program management · customer-facing technical advisory · demos & workshops · partner enablement · executive & technical stakeholder communication
CLOUD DELIVERY	On-prem to cloud migration · application modernization · infrastructure & platform delivery · IaC template review & guidance (CloudFormation) · load-balancing configuration guidance
CLOUD TECH	AWS (EC2, CloudFormation, IAM, load balancing, security & compliance tooling) hands-on · working knowledge of Google Cloud (Compute Engine, GKE, Cloud SQL, BigQuery, Migration Center, Vertex AI) & Azure foundations
SECURITY & GOVERNANCE	Threat & Vulnerability Management · AWS standards & compliance · NIST AI RMF · ISO/IEC 42001 · NIST CSF 2.0 · NIST SP 800-53 · AI risk operationalization
DELIVERY & TOOLS	Agile · SAFe · SDLC · ITIL · roadmaps & milestones · dependency & risk management · metrics & status reporting · Jira · CA Rally · Smartsheet · MS Project · GitLab

// PROFESSIONAL EXPERIENCE

AI Governance SME & Technology Partner Program Manager

Jan 2026 – Present

Slalom Consulting · Washington, DC

- Program manager for Slalom's technology partnership with **Anthropic**, serving as primary point of contact and coordinating technical alignment between the partner and internal delivery teams.
- Manage a portfolio of **20+ enterprise Claude enablement engagements** across the pipeline, partnering directly with Anthropic account and solutions teams to activate enterprise clients.
- Delivered 5 training cohorts and a growing course catalog across legal, finance, and engineering audiences; coordinated scoping, SOW finalization, facilitator coverage, and client kickoffs, clearing procurement and NDA blockers.
- Designed the technical framework for an enterprise AI hackathon with **113 participants across 20 teams**: authored the judging rubric, defined AI governance guardrails, and onboarded AI coaches; several resulting agents are being productized into reusable accelerators.
- Selected into a newly established **AI Governance SME** role advising enterprise clients on deploying AI responsibly; apply NIST AI RMF, ISO/IEC 42001, NIST CSF 2.0, and NIST SP 800-53, and built policy inventory, use-case catalog, and risk-register artifacts.
- Lead governance and delivery advisory for ChatGPT Enterprise deployments, aligning technical implementation with organizational risk tolerance and user-impact considerations.

Technical Program Manager & Team Lead

Jan 2020 – Dec 2025

Slalom Consulting · Washington, DC

- Technical program manager for an enterprise application-modernization program for **Abbott Laboratories**; provided delivery oversight, communicated timelines, risks, and challenges to executive leadership, and served on the escalation path through delivery.
- Led the first two waves of an **Oracle platform rollout for Digital Realty** (North America), coordinating across application and data teams to keep delivery on schedule.
- Drove **AWS standards and compliance** initiatives for a global consumer card and digital gaming platform serving millions of active users, embedding requirements into delivery workflows without disrupting feature releases.
- Served as program manager and solution owner for an enterprise **Threat & Vulnerability Management** platform, integrating inputs from security, platform, and application teams into a unified delivery pipeline.
- Led multiple concurrent programs across **10+ engineering teams**; built communication and execution frameworks that reduced coordination overhead by **30%** and accelerated delivery by proactively removing blockers across distributed teams.

Senior Technical Program Manager, AWS Cloud Operations

Dec 2016 – Apr 2019

JHC Technology · Alexandria, VA · USPTO **US FEDERAL**

- Led delivery and operations for a **\$12M AWS cloud platform program supporting 500+ users**, including migration of legacy on-prem applications to AWS.
- Worked with portfolio teams to align CloudFormation templates, providing review and guidance and partnering with cybersecurity for enforcement of standards.
- Managed and mentored a **12-person cross-functional engineering team** across compute, storage, networking, and security; delivered automation reducing manual effort by **40%** and improving reliability by **25%**.
- Developed long-term technical roadmaps balancing operational stability with future scalability.

Senior Technical Project Manager

Jul 2016 – Dec 2016

LMO · Arlington, VA **US FEDERAL**

- Delivered six high-visibility technical projects including cloud migrations and platform redesigns, among them the **Air National Guard website**.
- Led cloud modernization reducing monthly costs by **\$50,000** while improving performance and resiliency; presented regular technical updates and risk assessments to senior leadership.

Technical Program Analyst

Jan 2015 – Jul 2016

Addx Corporation · Alexandria, VA · USPTO **US FEDERAL**

- Advised infrastructure leadership on roadmap planning, prioritization, and execution; implemented budget tracking achieving **95% quarterly accuracy**.

Technology Project Manager

Jul 2014 – Jan 2015

MRIS (Bright MLS) · Rockville, MD

- Managed multiple concurrent software releases with internal teams and external vendors; led agile ceremonies and backlog management, proactively identifying and mitigating delivery and technical risks.

Earlier experience: Cross-functional delivery and operations roles spanning cloud managed hosting, video-game production, and enterprise IT (2003–2014).
